

## SIGHTING IN YOUR RIFLE

**Handy  
Hints**  
with  
**Dennis Figg**

MAKE SURE YOUR RIFLE IS UNLOADED.

MAKE SURE THE SIGHT IS PROPERLY MOUNTED AND THE MOUNTING SCREWS ARE TIGHT.

REMOVE THE BOLT FROM THE RIFLE.

PLACE A SIGHT-IN TARGET 25 YARDS FROM YOUR SHOOTING LOCATION.

SIGHT DOWN THE BARREL OF THE RIFLE AND MAKE SURE IT IS LINED UP WITH THE TARGET, **OR** PLACE A SIGHTING TOOL WITH AN ARBOR INSIDE THE BORE OF YOUR MUZZLE AND LINE UP THE CROSS-HAIRS OF THE SCOPE WITH THE CROSS-HAIRS INSIDE THE SIGHTING TOOL.

BE SURE TO WEAR EYE AND EAR PROTECTION.

FIRE A TEST SHOT TO BE SURE YOU ARE HITTING THE PAPER TARGET, THEN TRY SEVERAL DIFFERENT TYPES OF AMMUNITION (LOADS) TO SEE WHICH WORKS BEST OUT OF YOUR PARTICULAR RIFLE.

ONCE YOU DECIDE ON A LOAD, FIRE THREE SHOTS AT THE PAPER TARGET TO SEE WHERE THE BULLET IS IMPACTING. BASED ON THE LOCATION OF YOUR GROUP, MAKE ADJUSTMENTS TO YOUR SCOPE UNTIL THE BULLETS IMPACT THE TARGET WHERE YOU WANT THEM TO.
